

QUICK 42

The Highly-Productive Repair Bench
for Cosmetic and Structural repairs

Quick benefits for your bottom line

Sustainable solutions that bring value

We have a mutual interest to co-operate in developing high-class solutions that stand the test of time. By contributing to minimizing a bodyshop's down time, unnecessary work and transfers, we can contribute to a sustainable and long-term value for our customers. We work together with car manufacturers, bodyshops and insurance companies to constantly improve our products. We take our responsibility as a leading equipment manufacturer to develop solutions in pace with new technology. Products that add value today as well as in the future. That's sustainable business, for us as well as for our customers.

Outstanding capability to maximize output

It's necessary to utilize limited shop space in the leanest way possible to meet market demands in the most profitable way.

QUICK 42 create free space quickly due to its mobility. Designed without compromising strength or quality. Shops today require repair systems that are flexible and universally capable of handling various levels of vehicle damage in order to meet their customers

expectations and targeted delivery times.

QUICK 42 is a universal repair bench designed with productivity in mind to maximize bodyshops output and customer satisfaction.

Designed for cosmetic and structural repairs

QUICK 42 handles cosmetic damage as well as structural repairs. A repair bench integrated with Car-O-Tronic Measuring Systems and EVO System for fixation, holding and anchoring a universal fixture system that will effectively repair all vehicles. A multifunctional system designed to manage every different type of damage in a productive and accurate way.

Speeds up the repair process

A quick set-up, with easy access, on-wheels-measuring, quick anchoring and adjustable working height shortens the repair time. Cosmetic repairs can be done while the vehicle still stands on its wheels and if you discover structural damage you can start the repair immediately without changing benches. That's efficiency.

QUICK 42 will increase your profits

With the majority of collision repairs being cosmetic the lean design of QUICK 42 make it capable of processing a higher volume of cosmetic and structural repairs in less time. QUICK 42 System will also shorten your repair time, quality assure the process and reduce re-works. Benefits that will increase your profit, and your customer satisfaction as professional.

Quick and efficient diagnosis of the vehicle whilst standing on its wheels or in the clamped position.

Quick and secure clamping no matter if the vehicle is on its wheels or in the clamped position.

Easy to handle; multifunctional power unit and central satellite locations for hydraulics and air.

User-friendly hand control with all-in-one functions for automatic bench tilting, lifting, 10 ton pulling and hydraulic jacking.

Effective holding and clamping and no need for extra fixtures when using EVO holding and anchoring system.

Designed to meet future OEM-demands

Characterized by premium quality

By premium quality, we not only mean the engineering quality of the product, choice of materials and design. For us quality is equally about the systems value-creating functions and handling. Functions that make the customer's work process easier, faster and quite simply better.

Easy access; lightweight multi-purpose ramps, allows access to damage parts, anchoring points and to upper body areas.

Timesaving and ergonomic with removable multi-purpose ramps adaptable to suit all different sizes of vehicles.

Quality assured repairs with accurate measuring in real time during the entire process by Car-O-Tronic.

Precise information and documentation with the world leading database providing accurate information from diagnosis to final documentation.

QUICK 42 a repair bench for leading bodyshops

A repair bench for incremental profits

The price is what you pay. The value is what you get. Our know-how creates incremental profits and quality assured operations. The value we create is significantly different for our customers.

Take full advantage of QUICK 42

QUICK42 sets a new standard for universal repair benches with high performance and rapid results, both on the shop floor and in the profit and loss

account. Take it a step further; EVO System that lowers the operating costs since there is no need for extra fixtures. Car-O-Tronic offers precise vehicle information and real-time control during the entire process. With QUICK 42, EVO and Car-O-Tronic you'll have the best possible combinations for rapid results and premium quality from diagnosis, repair to final check and documentation.

Value-added solutions

Sustainable and long-term value
